

Task 3 – CRM / Client Management Dashboard UI Design (Project Explanation)

Project Overview

This project is a CRM (Client Relationship Management) Dashboard UI Design created for a digital marketing agency called Growth Hub Digital Agency. The dashboard helps agencies manage leads, clients, tasks, and follow-ups in one centralized platform.

The goal of this project is to improve workflow efficiency, reduce missed follow-ups, and provide a clear overview of business activities through an easy-to-use dashboard interface.

Problem Statement

Small agencies and service-based businesses often manage clients using spreadsheets, WhatsApp messages, and multiple disconnected tools. This creates confusion, missed opportunities, and poor client management.

The Growth Hub CRM Dashboard solves this problem by bringing lead tracking, client management, and task monitoring into a single system.

Target Users

Agency Owners

Project Managers

Sales Teams

Client Relationship Managers

Small Business Teams

Design Process

The dashboard was designed using Figma with a focus on SaaS and B2B dashboard design principles. The interface was structured to help users quickly access important information and manage daily workflows efficiently.

Screens Designed

1. Dashboard

The main dashboard provides a quick overview of:

- Total Leads
- Active Clients
- Pending Tasks
- Revenue Statistics
- Lead Pipeline Overview

- Upcoming Tasks

2. Leads Management

This screen helps users:

- View all leads
- Track lead status
- Filter leads by source and status
- Manage the sales pipeline efficiently

3. Clients Management

- Users can:
- View active clients
- Track project status
- Monitor client activity
- Access client information quickly

4. Tasks Management

- This section allows teams to:
- Track upcoming tasks
- Assign priorities
- Monitor pending and completed work
- Manage follow-up reminders

5. Client Profile Page

The client profile provides:

- Client details
- Project information
- Engagement status
- Meeting history
- Documents and notes
- Recent activity timeline

UX Decisions

- Clean dashboard layout for better readability
- Consistent navigation across all screens
- Quick access to business metrics
- Scalable tables for large datasets
- Clear status indicators and progress tracking
- Organized information hierarchy
- Professional SaaS-style user interface

Outcome

The final design provides a complete CRM dashboard experience for a digital agency. It improves lead tracking, client management, task organization, and overall team productivity through a centralized and user-friendly platform.

Tools Used: Figma
